

TAURI 7 RECEIVES 2021 SECURE CAMPUS AWARD

SDi LLC | April 2021 Announcement

SDi is pleased to announce that the [TAURI 7 Temperature Check Tablet](#) is a [2021 Secure Campus Awards](#) recipient and is being recognized for its outstanding achievement in the Screening Equipment category.

SDi has partnered with Glory Star to bring customers access to TAURI Temperature Check Tablets in response to the need for safe, accurate and reliable temperature checks. TAURI is designed to protect employees, visitors, and customers with a non-invasive temperature check by using advanced and proven

technology for detecting heat signatures emitted by the human body.

The TAURI 7 combines the TAURI temperature checking technology with additional features such as a dual camera for better facial recognition of staff profiles that can be saved to the device. It also has a built in TCPIP relay for door access control, ensuring only those without a fever can enter the building. Additionally, the TAURI 7 features a waterproof anti-glare screen, making it more versatile and ideal for outdoor use.

TAURI™

ABOUT TAURI

TAURI uses advanced and proven technology for detecting heat signatures emitted by the human body. Very easy to use, with minimal configuration required before deployment, this product range is able to provide another tool as we reopen and restart. The CDC recommends screening of employees upon entry to the workplace and at multiple times throughout the day. In addition, the same screening of customers and visitors is also recommended and has been approved by OSHA and the EEOC in the effort to keep people safe and able to reengage in society.
